DESCRIPTION AND PURPOSE OF ITEM

This item indicates the date the operational status of the bridge became effective.

For Status Code "D" (deleted) structures, it is the date the structure number was "logically" deleted from the ISIS database. ("Logically" means that though the status code "D" means "deleted", the structure number with all of its accompanying information is still in the ISIS database. "Physically" deleting a structure removes the structure number and all of its accompanying information completely from the ISIS database. No record of the structure number remains in the <u>active</u> ISIS database for physically deleted structure numbers.)

History is kept for all previous status records by the date entered for this item.

The current status date of the bridge <u>does</u> <u>not</u> appear in the history segment (Bridge Status History).

CODE AND SCREEN ENTRY INSTRUCTIONS

A six-digit code, 2 for month and 4 for year (include the century).

Enter the effective date of the status in the appropriate spaces, filling leading positions with zeros.

Status date transactions should be made in the same manner as Status Code transactions. See examples in Item 41.

NOTE: Adding a new structure to the database will automatically generate a status date that is equal to the date of the day the information is added. If this status date is incorrect, use the correct function on screen #11 (Change Current Status) to alter the date.

NOTE: The computer system will not allow the user to enter a year that is more than 2 years prior to the current calendar year. Future years can never be entered. For further information, contact the IDOT Central Office Data Management Unit, Structures, in the Bureau of Urban Program Planning.
